Pipeline operators are urged to take the following actions to ensure personal and environmental safety and the integrity of natural gas distribution pipeline facilities located in areas impacted by Hurricane Katrina:

1. Conduct additional leak surveys and inspection of above ground equipment as necessary to detect any damage which may have occurred.

2. For distribution systems or portions of systems that have been shut down, check for damage to piping, valves, emergency shutdown systems, risers and meter sets prior to restoring system operation and relighting customers.

3. Check for water that may have leaked into low pressure systems.

4. Identify and correct any conditions on the pipeline as required by the Federal pipeline safety regulations. 42 U.S.C. Chapter 601; 49 CFR 1.53.

Issued in Washington, DC on August 31, 2005.

Joy Kadnar,
Director of Engineering and Engineering Support.

[STB Finance Docket No. 34742]

Murray-Calloway Economic Development Corporation—Acquisition Exemption—Hardin Southern Railroad, Inc.

Murray-Calloway Economic Development Corporation (EDC), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to acquire by purchase from Hardin Southern Railroad, Inc., a rail line between milepost 38.34, near Murray, in Calloway County, KY, and milepost 30, near Hardin, in Marshall County, KY, a total distance of 8.34 miles.2 EDC states that it does not intend to operate the line or to hold itself out to provide common carrier service.2

---

2 EDC states that ‘‘* * * [t]o the extent that the line is considered a ’line of railroad’ the EDC intends to embargo or discontinue service over the rest of the line.’’ Because EDC is acquiring the 8.34-mile line pursuant to 49 U.S.C. 10901, the entire line is a line of railroad, and EDC is acquiring a common carrier obligation to either provide service over all of it or assure that service is provided by another carrier. Should EDC seek to terminate that service, it is not clear whether the EDC’s holding the line of railroad also includes the right to provide service on the line for a fee. Pipeline and Hazardous Materials Safety Administration

Pipeline Safety Advisory: Potential for Damage to Natural Gas Distribution Pipeline Facilities Caused by the Passage of Hurricane Katrina

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice; issuance of advisory bulletin.

SUMMARY: PHMSA is issuing this advisory bulletin to owners and operators of natural gas distribution pipeline facilities to communicate the potential for damage to pipeline facilities caused by the passage of Hurricane Katrina on August 29, 2005.

ADDRESSES: This document can be viewed on the Office of Pipeline Safety (OPS) Home page at: http://ops.dot.gov.

FOR FURTHER INFORMATION CONTACT: Joy Kadnar, (202) 366–0568, or by e-mail at Joy.Kadnar@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The purpose of this advisory bulletin is to warn all operators of natural gas distribution pipeline facilities that safety problems may have been caused by the passage of Hurricane Katrina on August 29, 2005.

Past instances of flooding have resulted in significant pipeline system damage including exposed pipelines, failure of pipelines crossing rivers and streams, damage to meter sets, pipeline leaks from soil movement, and water leaking into pipeline systems. Due to the storm surge and extensive flooding caused by Hurricane Katrina, extensive damage to facilities may be expected.

The Federal pipeline safety regulations (49 CFR part 192) require operators to shut down and start up pipeline facilities in a safe manner and to conduct periodic pipeline patrols to detect unusual operating and maintenance conditions and to take corrective action if conditions are unsafe.

Gas pipeline safety regulations require that operators mitigate the safety condition if a pipeline facility is damaged. The regulations require damaged pipeline facilities be repaired or replaced as necessary to eliminate the hazard, and that damage resulting in a death or injury or exceeding $50,000 must be promptly reported to the National Response Center (NRC) at 1–800–424–8802.

II. Advisory Bulletin (ADB–05–07)

To: Owners and operators of natural gas distribution pipeline facilities.

Subject: Potential for damage to natural gas distribution pipeline facilities caused by the passage of Hurricane Katrina.

Advisory: All operators of natural gas distribution pipeline facilities in the states of Louisiana, Mississippi, Alabama, and Florida were warned that pipeline safety problems may have been caused by the passage of Hurricane Katrina on August 29, 2005. Likely problems include but are not limited to damage of above ground equipment due to flooding and flying debris, damage to buried pipelines from soil movement, and water leaking into low pressure pipelines.

1 This transaction is related to STB Finance Docket No. 34741, KWT Railway, Inc.—Lease and Operate—Murray-Calloway Economic Development Corporation, wherein KWT Railway, Inc. (KWT), has filed a notice of exemption to lease and operate the portion of rail line between milepost 38.34 and approximately milepost 37.34.

2 EDC states that ‘‘* * * [t]o the extent that the line is considered a ’line of railroad’ the EDC intends to embargo or discontinue service over the rest of the line.’’ Because EDC is acquiring the 8.34-mile line pursuant to 49 U.S.C. 10901, the entire line is a line of railroad, and EDC is acquiring a common carrier obligation to either provide service over all of it or assure that service is provided by another carrier. Should EDC seek to terminate that service, it is not clear whether the EDC’s holding the line of railroad also includes the right to provide service on the line for a fee.
